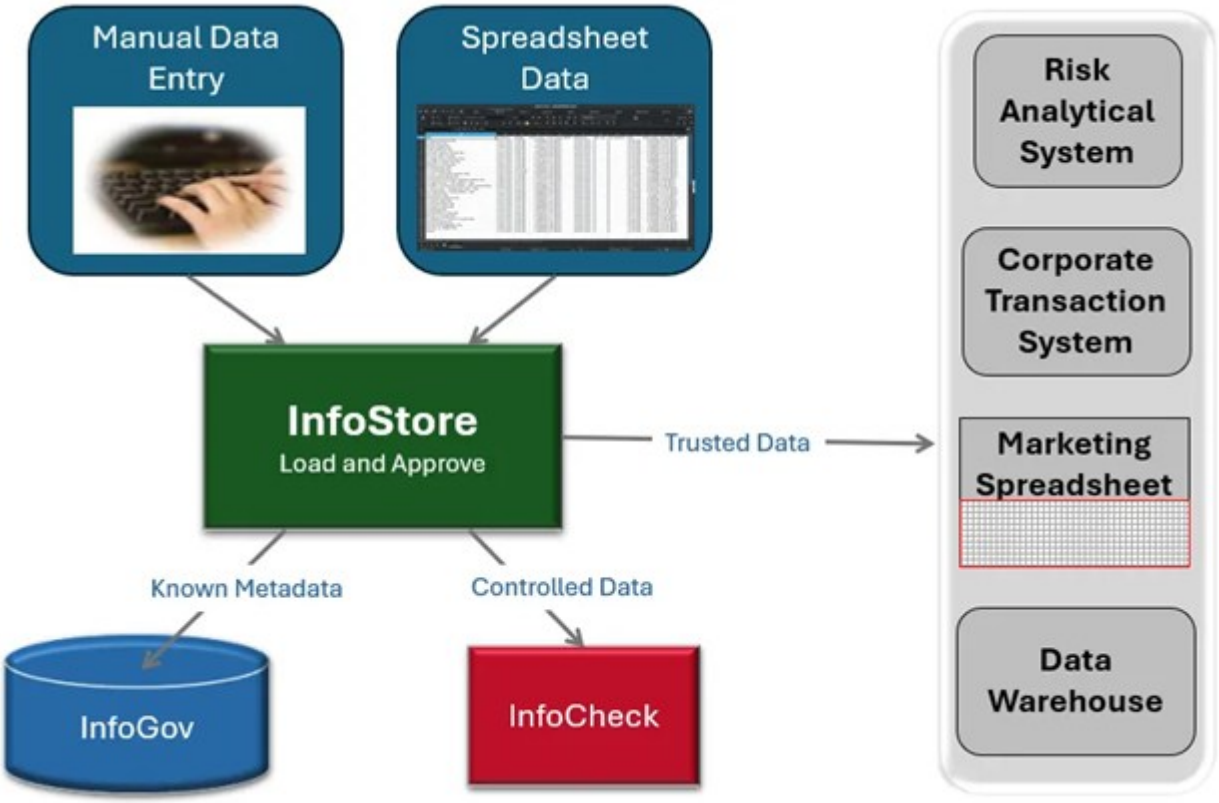
InfoStore ®

Bring Unmanaged Data Into the Circle of Trust.

Transform unmanaged sources (spreadsheets, user-developed applications, offline files, manual inputs) into verified, governed, auditable data assets that can be used confidently in reporting, operations, and AI.



InfoStore Delivers

- Ability to load uncontrolled spreadsheets and UDAs
- Governed source for corrections to production data (without IT change requests)
- Four-eye review and approval workflows
- Full auditability of historical changes
- Seamless integration with InfoGov® and InfoCheck®
- Simpler, faster alternative to traditional MDM solutions
